2026

01 / OUR BUSINESS

Parts, people and practical support.

Beccentric (Pvt) Ltd supplies industrial engineering components and replacement spares for production, maintenance and plant operations. Our range brings together conveyor systems, stainless-steel and hygienic fittings, mechanical drives, process equipment, automation and maintenance supplies.

Food and beverage production is a core focus - including dairy, bakeries, bottling and packaging. We also support wider industrial and general engineering requirements.

346
Current website product ranges

11
Supply categories

9
Engineering service areas

Built around production requirements

01 **Food & beverage**
Conveying, hygienic connections, process spares and factory utilities.

02 **Packaging & bottling**
Chains, belts, guides, sensors and machine-specific replacement parts.

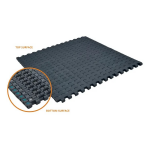

03 **General engineering**
Bearings, drives, valves, materials and maintenance components.

OUR PURPOSE | Help customers define the right requirement, source suitable parts and coordinate the support needed to keep operations moving.

02 / PRODUCT RANGE

A connected industrial range.

From one replacement component to a coordinated maintenance requirement.

Conveyors & belting

Have a part number or a photograph?

Send your enquiry

Sizes, materials, configurations and current availability are confirmed against each enquiry. View the detailed product catalogue or use the website to build a quotation list.

03 / ENGINEERING SUPPORT

Supply and service, working together.

Coordinated with suitable engineering partners to an agreed scope.

01
Conveyors & belt splicing

Belt splicing, fitting, tracking concerns and component replacement.

02
Condition monitoring & reliability

Bearing checks, pump vibration and electrical-panel condition inspections.

03
Shaft alignment

Motor, pump and gearbox alignment requirements and agreed records.

04
Motor & gearbox support

Assessment, servicing, repairs and replacement coordination.

05
Pumps, valves & seals

Service, fitting and replacement support for process and utility equipment.

06
Compressor servicing & repairs

Routine service enquiries, fault assessment and compressor repair support.

07
Electrical & automation support

Sensors, drives, panels and machine-control support.

08
Stainless fabrication & pipework

Fabrication, welding, hygienic fittings and pipework modifications.

09
Insulation & plant maintenance

Insulation replacement, lagging and planned plant maintenance.

HARARE & NEARBY TOWNS

Visits outside Harare are arranged by agreement. Scope, site requirements, attendance and commercial terms are confirmed before work begins.

04 / OUR APPROACH

Clear requirements. Professional follow-through.

Reliability

A structured enquiry and quotation process with specifications and lead times confirmed.

Customer focus

Support built around your equipment, application and operating requirements.

Integrity

Clear communication about exact replacements, alternatives and information still needed.

Collaboration

Parts supply and engineering support brought together around an agreed requirement.

From enquiry to supply

01

SEND

Part number, photos, dimensions and quantity.

02

CONFIRM

Technical details, options and application.

03

QUOTE

Specification, availability and commercial terms.

04

AGREE

Order, delivery or service arrangements.
