MODULAR CONVEYOR BELTS

2124 Narrow Flat-Top Conveyor Belts

Narrow 2124 mould-to-width flat-top conveyor belt enquiries for compact straight-running conveyor sections. Identify the width code and material instead of assuming that visually similar narrow belts share the same sprockets, guidance or working limits.

Unit for enquiry: metre | Product range

Product series reference. Width, material, pin and sprocket compatibility are confirmed with your quotation.

PRODUCT DETAILS

Series	2124 straight-running mould-to-width belt
Published width references	K134: 34 mm; K200: 50.8 mm
Material reference	Advanced-performance polymer alloy; confirm the exact material grade for the selected belt
Sizing	Confirm width code, pin arrangement, underside guidance and mating sprockets
Duty	Working load and temperature require the exact manufacturer specification

TYPES / CONFIGURATIONS

K134 mould-to-width | K200 mould-to-width

Select an enquiry configuration. Exact belt construction, mating sprockets and operating limits require confirmation. This is a Beccentric product information and selection sheet. It is not a certified engineering drawing or a guarantee of stock. Confirm the exact product, compatibility and operating limits before ordering.

Specify your requirement

2124 Narrow Flat-Top Conveyor Belts

The choices below help prepare an enquiry. Other sizes and identification assistance can be requested. Not every combination is available.

Required belt width (mm)	State assembled width or existing width code
Required belt length (mm or m)	State open length or endless length and units
Existing series / material code	Read belt markings or provide photographs
Sprocket details	Existing sprocket series, teeth and shaft bore
Product conveyed and operating conditions	Load, speed, temperature, cleaning chemicals and wet/dry duty
Width code	K134 / 34 mm, K200 / 50.8 mm
Mould-to-width version	K134, K200
