MAINTENANCE SUPPLIES

Electrical Insulating Rubber Mats

Electrical insulating matting for work areas around switchboards and motor control centres. Selection must follow the installation's voltage and safety requirements; thickness or appearance alone does not establish the mat's electrical rating.

Unit for enquiry: metre | Product range

Pictured: electrical insulating matting. The printed test voltage is not a working-voltage rating. Specify the required class and documentation.

PRODUCT DETAILS

Selection	Applicable voltage class and standard must be stated
Dimensions	Required length, width and thickness
Documentation	Request current electrical test / conformity documentation
Environment	Indoor/outdoor, moisture, oil and floor conditions

TYPES / CONFIGURATIONS

Switchboard / MCC matting | Cut mat | Roll length | Replacement to specification

This is a Beccentric product information and selection sheet. It is not a certified engineering drawing or a guarantee of stock. Confirm the exact product, compatibility and operating limits before ordering.

Specify your requirement

Electrical Insulating Rubber Mats

The choices below help prepare an enquiry. Other sizes and identification assistance can be requested. Not every combination is available.

Required standard / voltage class	Installation requirement or existing certified mat specification
System / working voltage	State voltage and AC/DC
Width (mm)	Required mat width
Length (mm)	Required cut length or roll length
Thickness (mm)	If specified by the installation
Installation conditions	MCC, switchboard, moisture, oil and surface

INCLUDE WITH YOUR ENQUIRY

Required electrical class/standard, working voltage, width, length, thickness if specified, environment and required documentation.

Quantity: _____ Required date: _____

Company / RFQ reference: _____

Exact replacement only / alternative for approval: _____
