SPECIALIST & OEM SPARES

Machine & OEM Spares Sourcing

Part-number sourcing for bottling, packaging, milling and factory equipment, including condenser fan assemblies, machine guards, format parts and custom replacement components. Send the complete machine identity, part reference and drawings to establish the correct supply specification.

Unit for enquiry: each | Product range

Product range example; confirm the make and configuration quoted.

PRODUCT DETAILS

Machine	Manufacturer, model and serial number
Part	Reference or drawing position
Supporting details	Nameplate and component photographs

TYPES / CONFIGURATIONS

Exact manufacturer part | Alternative for approval | Help identify | Industrial filter element | Heat exchanger plate / gasket | Mill screen / hammer / shaft | Expansion joint / bellows | Compressor replacement parts enquiry

This is a Beccentric product information and selection sheet. It is not a certified engineering drawing or a guarantee of stock. Confirm the exact product, compatibility and operating limits before ordering.

Related replacement sourcing

Machine & OEM Spares Sourcing

Industrial filters

Specify the filter element reference, medium, micron rating, dimensions, seal arrangement and flow/pressure conditions. Air, oil and liquid elements are selected separately.

Heat exchanger spares

Include the exchanger manufacturer, model, plate identification, gasket material and the required component. Confirm the plate pattern, ports and arrangement against the original equipment.

Milling & machine wear parts

Send a dimensioned drawing or original component reference for screens, hammers and shafts, including material and wear requirements.

Expansion bellows & joints

Include connection dimensions, medium, temperature, pressure and required axial/lateral/angular movement. Material and movement ratings need confirmation for the selected joint.

Compressor replacement parts

Identify whether the equipment is a compressed-air compressor or a refrigeration/chiller compressor. Send the manufacturer, full model and serial number, original part reference and a nameplate photograph. Inlet valves, gasket sets, rider rings and compression rings must match the specific machine; refrigeration compressors also need refrigerant and electrical details.
