CONVEYOR ROLLERS & DRIVES

PolyVee Belt-Driven Conveyor Rollers

Conveyor rollers with multi-rib drive heads for PolyVee belts. Suitable configurations connect driven and follower rollers in powered conveyor zones. Match the belt profile, rib count, roller centres and drive-head position to the existing system.

Unit for enquiry: each | Product range

Manufacturer range illustration. The supplied make, dimensions, drive head and finish are confirmed in your quotation.

PRODUCT DETAILS

Drive	Multi-rib belt running on a separate grooved drive head
Belt match	Profile, rib count, belt reference and roller centre distance
Installation	Drive-head offset and shaft fixing must match the frame
System	Confirm compatibility with the powered roller and control arrangement

TYPES / CONFIGURATIONS

PolyVee follower roller | PolyVee roller with stainless tube | Replacement drive belt enquiry | Powered roller matching enquiry

These fields describe your enquiry. Final dimensions, loading, speed, environmental suitability and lead time must be confirmed for the selected roller. This is a Beccentric product information and selection sheet. It is not a certified engineering drawing or a guarantee of stock. Confirm the exact product, compatibility and operating limits before ordering.

Specify your requirement

PolyVee Belt-Driven Conveyor Rollers

The choices below help prepare an enquiry. Other sizes and identification assistance can be requested. Not every combination is available.

Tube outside diameter (mm)	Measure the roller tube, not the sprocket
Roller face length and between-frame length (mm)	State both dimensions separately, or ask for help identifying
Shaft diameter and end mounting	Thread size, spring-loaded shaft, flats or drawing reference
Tube material / finish	Zinc-plated steel, Stainless steel, PVC, Match existing roller
Load, conveyor speed and environment	Item weight, rollers supporting it, wet/dry duty and temperature
Existing roller code / drawing	Manufacturer code, RL / EL / AGL markings or photo reference
Belt profile / code and rib count	Read the belt marking or provide a photograph
Roller centre distance (mm)	Centre-to-centre spacing of adjacent rollers

INCLUDE WITH YOUR ENQUIRY

Send roller diameter, face length, between-frame length, shaft ends, material, drive details, quantity and required date. A drawing or clear photographs help us match the replacement.

Quantity: _____ Required date: _____

Company / RFQ reference: _____

Exact replacement only / alternative for approval: _____
