Request a drawing, material certificate, food-contact declaration or safety data sheet when your application requires one. These documents relate to the exact product quoted.

Related replacement sourcing

Stainless Fasteners & Springs

Workshop tools

Provide the tool reference, task, dimensions, capacity and power supply where applicable. Torque tools also need the range, drive size and required calibration documentation.

Lockout & spill-response supplies

Describe the equipment to isolate or the substance to contain, required size/quantity and site specification. The exact product and documentation are confirmed before quotation.

Cleaning brushes & brooms

Choose soft or stiff bristles, hand brushes, brooms or tube brushes. Provide head dimensions or tube diameter, handle connection, bristle material, cleaning chemicals and any hygiene or colour-coding requirements.

Industrial silicone & adhesive sealants

Specify the existing product reference, substrates, joint dimensions, movement, operating temperature and exposure to fluids or chemicals. Colour alone does not establish compatibility; food-contact or other documentation must apply to the exact selected product.

PTFE & engineering plastic stock

Request rod, billet, tube or sheet with material grade, diameter/thickness, length and quantity. Include machining allowance, operating conditions and any food-contact or material documentation required.

Welding consumables & workshop PPE

Specify electrode or filler classification, diameter, base metal and welding process. For protective equipment, provide the task, required standard, size and compatibility with other equipment.
